

Installation manual

1. Download the file “SpinStudioJ_1.9.4.7z” from website <http://www.spinstudioj.net/spinspj>.
2. Unzip the file “SpinStudioJ_1.9.4.7z” to disk. The unzipped directory is “SpinStudioJ_1.9.4”
3. Open the directory “SpinStudioJ_1.9.4”, and then double click “SpinStudio.exe”. Users can set the NMR data directory for the software.
4. Click menu “Tools/Python Editor”, the scripting editor will pop up. Click items under “Examples”, the scripting file will be displayed in the text area;
5. Click the button  in the tool bar, then the script will be executed.
6. If users need to execute scripts of deep learning by GPU card, users can download “python_gpu.7z” and unzip to replace the directory “SpinStudioJ_1.9.4/python”, and then restart SpinStudioJ
